

THE F-WORD™

THAT MAY BE HOLDING YOU BACK FROM SELF-SUFFICIENCY

01

FRUSTRATION

You're beaten down by a no-growth role. The future feels flat — and impossible to change.

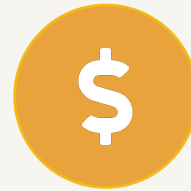

02

FEAR

Fear of change. Fear of failing. Even fear of succeeding. Often disguised as "being practical."

03

FINANCES

You assume self-sufficiency is out of reach — before you've asked the real questions.

04

FAMILY

Loved ones mean well. Their hopes and worries quietly shape every career decision you make.

05

FRIENDS

Strong opinions about risk — often projecting doubts of their own — drown out your voice.
